

## Quality and environment policy

The management of Flexilast Ek. För. has adopted the following quality and environmental policy:

- We uphold our high ambitions to deliver our services and support on time, with the intended function and quality.
- We continuously improve ourselves and our routines to increase customer satisfaction, conserve natural resources, and reduce environmental impact.
- We take environmental impact into consideration in all aspects of our operations—from transportation to supplier selection, purchasing, usage, service, and end-of-life handling.
- We comply with all relevant legislation and other applicable requirements, and we understand what our customers and employees experience and expect within our field.
- Our core values—Flexibility, Commitment, and Accessibility—permeate our internal work as well as all external interactions with customers, suppliers, and other stakeholders.

Altogether, our services and support are reliable from both a quality and environmental perspective.

Flexilast Ek. För. is the supplier that actively works with continuous improvement and achieves high customer satisfaction!
